Sprint 3 Report - Check Up Health Care

ACTIONS TO STOP DOING:

- Coming up with ideas without determining if the method is feasible with current state of architecture. This has caused a delay in the overall progress of our product.

- Showing up to team meetings without an agenda or questions to ask if stuck. We have wasted a lot of time during the beginning of our meetings due to this.

ACTIONS TO START DOING:

- Communicate more even though other classes may be taking a lot of time. It is vital that teams stay in contact no matter how busy one may be. Staying on the same page is dire moving into our last Sprint.

- Help update documentation and README so users can install all the correct packages before running scripts

ACTIONS TO KEEP DOING:

- Coming up with solutions to current backlogged items. It is important that if we encounter a road bump, that we have means to get around it.

- Making scripts readable and easy to add to with the addition of helper functions and organized code formatting

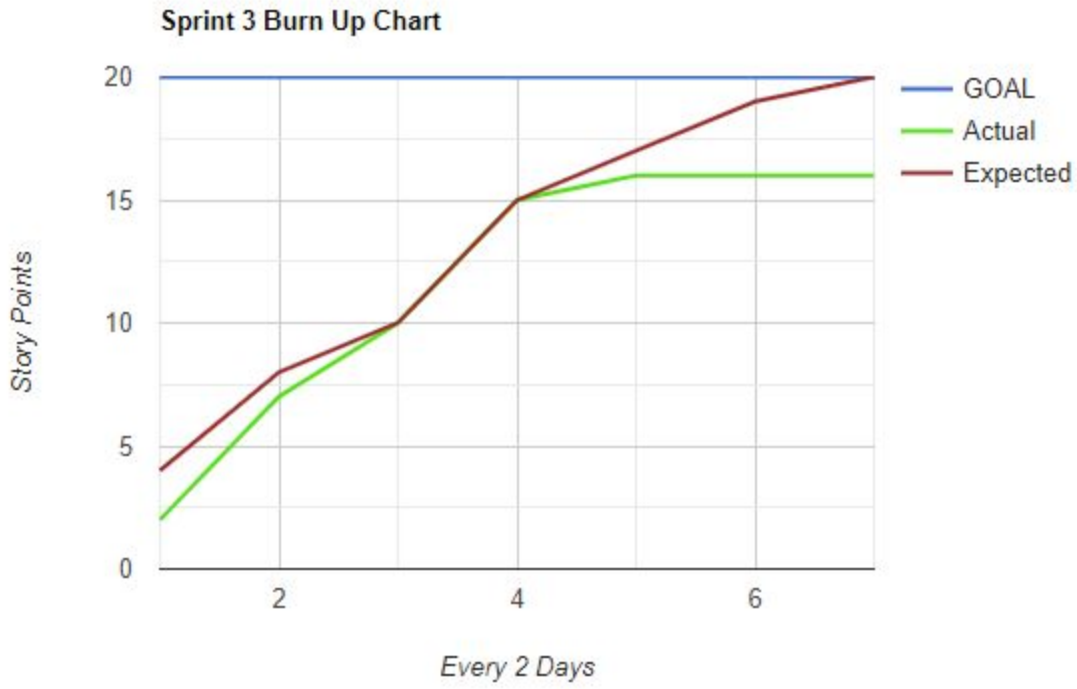
WORK COMPLETED / INCOMPLETE:

- **Completed user story:**
    - As a developer, I must store address coordinates in a local dictionary to prevent repetitive Google Maps conversions (which cost money)

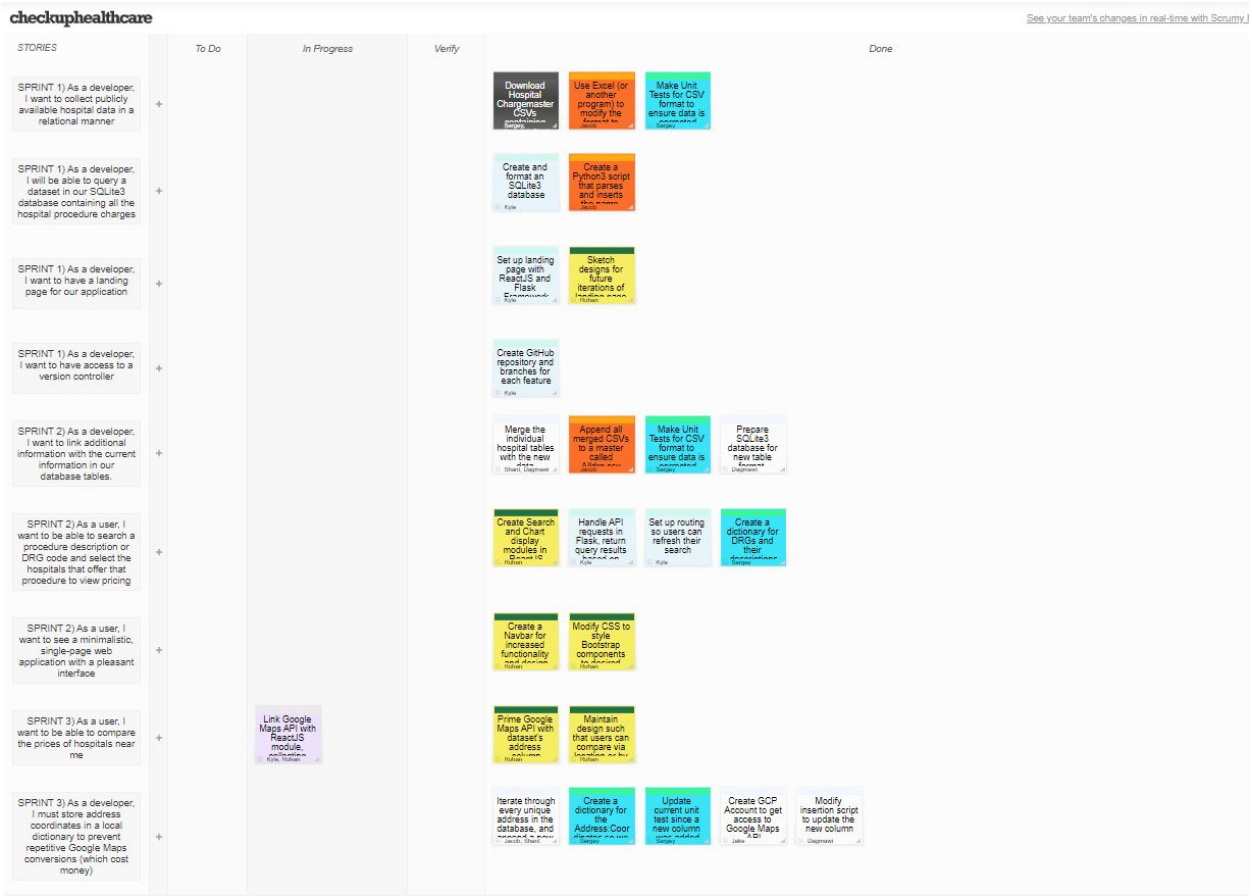
- **Incompleted user story:**
    - As a user, I want to be able to compare the prices of hospitals near me

WORK COMPLETION RATE:

- **Total number of user stories completed during the prior sprint: 1**
- **Total number of work hours per team member: ~ 6 Hours**
- **Total number of days during prior sprint: 14**



SCRUM Board:



SPRINT BACKLOG:

- As a user, I want to be able to compare the prices of hospitals near me
    - Must finish implementing current location to hospital coords distance
